

What Can I Do in the Malleable Area?

I can use tools carefully and safely.

I can tell you what I plan to make.

I can keep trying when I face challenges.

I can explore and make different textures and describe these.

I can make changes to malleable materials, in ways such as patting, rolling, pinching and stretching.

I can make simple representations of things I see, feel and imagine.

I can use different tools and techniques to complete my work.
